

- Removable if there were only 2 gates or scanners can be positioned on a single table top
- If removed only USB HID scanners can be supported
- The devices will be developed adhering to electronic product development standard practices

Option 1

- Most Robust
- Minimum latency
- Need to setup in-situ
- Range 100m (extensible using routers)

Option 2

- Vulnerable than ethernet
- Easier setting up
- Range 30m (If in line of sight 100m)

Option 3

- Vulnerable than ethernet
- Easier setting up
- Increased Range
- Higher Cost
